

RE: Press Release

The 2014 Decorah Street Improvements project has been bid and approved by the City. This project will include the following streets:

Streets

Riverview Drive – 5th Ave to North St and Intersection
North Street – Dike Rd to North St Header
Julian Street – Heivly St to Summer St
Summer Street – Julian St to Monroe St
Monroe Street – Heivly St to Goose Island Dr.
Grant Street – Paine St. to Division St
Fifth Street – South Ave to Decorah Ave
West Street – Iowa Ave to Fifth Ave

These streets will receive asphalt milling to remove a portion of the existing asphalt and a new asphalt overlay will then be placed over the entire street. Milling will take place ahead of the asphalt work and typically take approximately a half day to complete. Asphalt work will follow, in some cases not immediately, but streets will be useable in the interim period. Asphalt work will also take approximately a half day with traffic usually restored the following day. Some isolated concrete curb and sidewalk work may also be a part of the work.

The Julian Street intersection with Heivly Street will be reconstructed as well. This will result in some traffic detours.

Portions of this work may begin in May and continue into the summer where necessary.

There is no assessment for this work. The asphalt overlays are being done to preserve and extend the life of the existing streets.

Please contact Erdman Engineering, P.C. at (563) 382-4194 if you have any questions regarding the project.
